Pricey, but man you could spend hours playing this game.. Oh man it's heavy strategy. I used to play these in the 90's when we had no internet connection and I could concentrate. now I'm old and nothing interests me than fast action or light strategy games.. i bought cauldron on 20July15 and have been playing since. There was a nice learning but it was worth it. i really like the real time management aspect. make a plan. watch it all go wrong and adjust. great fun great game. really great game. thanks Inl i want my steam key for cauldron. still playing version i bought. not using steam version but can't wait. at least i hope i might geat a steam key for cauldron. i will buy others.. Probably the best battle simulator I played. The main "plus" is a competent AI (both friendly and enemy). The main "minus" is no tutorial or explanation. The graphics are minimalist--just enough to give you the info you need. The GUI takes some getting used to. And so the game is "hard work" . but rewarding when your plans succeed. The player must study the map, study the Order of Battle, and consider how best to make use of time & space. The scenarios appear pricey, but you can be replaying them for years.. Most detailed and realistic war simulation ever!. i like the concept of this game because it is a hyper-realistic strategy game and it stands out but they need a proper word based tutorial level because i dont know how to even move the units but i have only been playing for twenty minutes. Forget my previous comment, for those who dont know check the buttom tabs to to control your troops specially using ORD tab. Excellent game for the operational level of warfare that has no real equivalent as best I can tell. Figuring out how to play at a basic level isn't difficult at all, but the level of detail & depth in the game mechanics is very high - this produces realistic effects & constraints on your actions. The AI overall is very good (though is does sometimes have stupid moments) and will respond dynamically to your actions on the battlefield. If you are interested in ww2 era military command then this game is a must get, also the core game along with a couple of scenarios is completley free so there is no reason not to try it out.

[DevBlog] Weapons and Vehicles of Khalkhin-Gol DLC : Soviet soldiers and tankers inspect captured Japanese equipment Today is another post from dev blog series. This time we'll talk about weapons and vehicles available with Khalkhin-Gol DLC. As usually, everything we mention or describe below is a work in progress. Any methods, numbers, figures and visuals posted in devblogs are not final and may change by the time DLC will be released officially.. Command Ops 2 Steam Workshop goes live : Our Steam Workshop goes live this weekend, new functionality is already in place and the guide is up to date. Please give us your feedback, also don't hesitate to send your bugreports and suggestions. In the Workshop there is an excellent Caen scenario pack by Bie available for subscription.. [DevBlog] Direct firing gun accuracy for Eastern Front DLCs : As we have mentioned before, we will be posting regular devblogs about the progress of our Eastern Front DLC development. Here is the first one (and sorry: it's really big).. Our first Eastern Front DLC pack to be released in 2019 : Guys, We are happy to announce that we are resuming our Eastern Front scenario pack development. The first one we plan to release later this year and it will be covering Soviet - Japanese border conflict in May - August 1939, known as Battle of Khalkhin-Gol or Nomonhan Incident.
